How different these opinions are from the views entertained by His Excellency the GOVERNOR, for whom Mr. HAYLLAR appeared as an apologist on Monday, will be seen by ever learned these towers of discord may have a few extracts from the report in question. First as to flogging, the Commission say :- | Yours, &c., It is in its deterrout aspect that the Commission rogant our system of punishment as altogether failing. A sentiment of humanity, very much inisplaced when we dome to doal with a race that misunderstand it. and regard it as a sign of weakness, has always stood in the way of the free indiction of the penalty which the Chinaman particularly dreads, that of the lash. Its inexerable application to one class of offences excoodingly common in former yours, that of wrenching organists from women's cars, has cansed that crime to disuppose almost entirely from the original calmadar, and highway robbarias with viologos have undergone marked diminution from the came cause. MONDAY'S MEETING!

TO THE EDITOR OF THE "DAILT PRESS." SIR,-What I wanted to say yesterday, but brough inexperience of public meetings was unable to bring out in order, amounted to this. That if the police are not allowed to arrest suspicious persons how can they be blamed for incrosse of crime. As to deportation, the photograph system may be very well at home but life here is shorter, police and gaol officials are not here long enough to remomber a very old offender. and changes are more frequent than at home. Thon what is the use of deporting a criminal if you do not offeetually brand him or send him where Ir is interesting and also important at this he will not be likely to return. These deported folons are thoroughly acquainted with the crimi they return, and, what is worse, probably return in company with their oriminal friends from the mainland. As flogging on the breech seems to

be allowed by H.E. the Governor why not also have branding on the breech? The most wretchedly abject native generally has at least a piece of rag big enough to conceal the locality of to the objection raised against branding behind the car that it prevents reformation of the criminal by preventing him obtaining honest employment, I also wanted to say that to my own knowledge great efforts had been made by certain unworthy persons to cause dissension between the untive and foreign portions of the community. Howbeen, their mean, unmanly trick has happily been frustrated in the natural order of things,-

16th Soptember. am very sorry to have to represent my former favourable letter on the excellent prospects of our harvest as premature. Since was sent you, deluges of rain have converted streamlets into rivers, and rivers into lakes, have brown down numerous houses, and carried away Hwan on the north, the port of Newchwang on west, and the hills on the east, -the fairest and far the richest portion of Linotung, may be represented as all under water for the better part of a month. The main rivers were from five to ten feet higher than the level of their normal flood. Only a small proportion of the tall millet shall be gathered in over a very large area of the ground indicated, while the small millet, vellow millet, and pulse props are all but totally rotted. These latter were completely under water over most of that area. It is extremely difficult to estimate what amount of erop may be gathered in off these fields, but if the farmers will average a fifth of a full year I tion of what was really useful, and assuaged think they will do wolk. The further north the better, for though Moulden is only 150 feet

Many boxes of letters are received at the Post Office not sealed, that is to say, the box is

fastened with sealing wax but there is no impression of a seal. The attention of boxholders is called to the necessity of carefully, sealing such boxes with some recognisable seal, and of sending a chitbook or receipt with them. The omission of the latter precaution leaves a doubt as to whether the contents of the box ever reached the Post Office; the omission of the former, as to whether part of them might not have been abstracted for the sake of the Postage Stamps. COMMUNICATION WITH BATAYIA. The Netherlands India Packets leave Singa-

pore fortnightly, and are fitted to the arrival of the outward P. & O. Mail from Europe. The French Pockets for Batavia wait at Singapore for the Packet from China, and run formightly. It follows that, to forward Correspondence to Batavia with the least delay, the following are the best opportunities :-

CORRUPTION IN TURKEY. When the police force was determined upon as a means of preserving order in the district of Lebanon, it was resolved that the men should be dressed in uniform, and tenders were invited in Beyrout for 1,500 infantry and 500 mounted suits, of a certain quality and of a certain make. Three or four tenders were forthcoming, and one of these was accepted. But it was very shortly discovered that the tenders, although made in the horrowed names of certain native firms in Beyrout, did, in point of fact, emanate from certain officials connected with Daoud Pasha's government, and that a regular stock exchange, or bourse, was being held every day within the precincts of the palace at Beited-Deen, for the purpose of buying and selling these tenders; that one of the latter, which had been accepted, was found to have changed hands no less than three times, each rate at a price which was a reduction upon the former prices, so much so that the present holder of the contract could ing of the requisite quality without and immense personal loss to himself.
